G. G. McGeer, K. C., M.L.A.
Will be Here on July 25th
Will Give an Address on Our Banking
System and Other Economic Questions

W. R. Howson, Liberal Leader,
Will Also Address the Meeting.

G. G. McGeer, K.C., M.L.A., of Vancouver, B.C., will address a meeting in the Shading Rink, Lacombe, on Wednesday, July 25th, on a question of vital interest to everyone at this time—Our Banking System, and Bankruptcy Reform. Mr. McGeer is one of Canada's outstanding authorities on these questions, and his evidence given before the Banking Committee of the House of Commons received favorable comment from the leading economists of the continent, both in Canada and in the U.S. With reference to the functioning of the banks in the U.S. and Canada during the depression, Mr. McGeer said in a recent interview:

"...If all our depositors had gone to the Canadian banks and did what depositors did in the United States—ask the banks to give their money up—we would have bankrupted all the banks in Canada. It was not that the banks were sounder, but it was because the Canadian people knew that if they called upon the banks for their money the government would step in and issue the money if it was necessary, because we know that for the Finance Act in a time of crisis a bank can go to the government and ask the government to monetize the bank's securities by turning over legal tender cash. But when we examine the banking situation in Canada from the view of the solvency of the nation, we find a different story. The banks of the United States did not allow their people and their governments to go on borrowing credits abroad. They lent credits abroad. We are bankrupt internally and internationally as well, and when it comes to the proportion of unemployment, to the proportion of loss of bank deposits, to the proportion of loss of homes, farms and loss of business, and so forth, our banking system in Canada has not served us one bit better than has the banking system of the U.S. served the people of that nation. Our government has had to come to the rescue of our banks and everyone else in international exchange. It has had to help every province and every municipality out. And even the powerful C.P.R., an exceptionally well managed and carefully developed company, possessed of enormous resources, did not have any credit without a guarantee from the government. The banking system here is taking a lot more credit than it is entitled to take because of the exceptional patience and co-operative spirit of the Canadian people."

W. R. Howson, Provincial Liberal Leader will also be present and address the meeting. It will be well worth the time of any of our readers to come to this meeting and hear Mr. McGeer and Mr. Howson.

GOLDEN JUBILEE
CELEBRATION AT
RED DEER, JULY 24-26

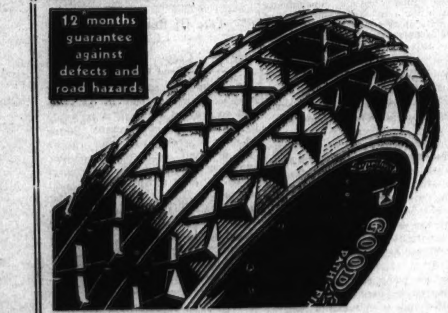

A monster parade depicting the early settlement of the Red Deer district will be one of the big features of the Golden Jubilee Celebration, Old Timers Re-union and Red Deer Fair, at Red Deer on July 24 and 25—next Tuesday and Wednesday. The parade will take place on Tuesday, July 24th at one o'clock and at 5:30 p.m. of the same day there will be a Buffalo Barbecue with free barbequed sandwiches for everybody. On Wednesday at noon there is a banquet for the real pioneers at which the old timers will be the guests of the entertainers. The main building of the fair grounds has been set apart as headquarters for the old timers.

FURTHER HIGHWAY CONTRACTS

The third group of contracts for main highway gravelling will be awarded by provincial public works department on July 19. These contracts will cover re-gravelling and second course work on the Cardston-Lethbridge highway, and from Monarch to Pincher Creek, Camrose to

HEAVY WOOL SHIPMENT

The Central Alberta Wool Growers made their annual shipments last week from Wetaskiwin, Ponoka, Lacombe and Red Deer, about six tons being sent forward. The price this week was satisfactory to growers, a little higher than it has been for years.

MUNICIPAL DISTRICT OF CROWN NO. 395
Lacombe, Alberta.
June 18, 1934

The Council of the above District met in the Municipal Office, there being present: Councillors Armstrong, Huopelainen, Parker, Hald, Steward and Stewart.

Stewart: That Municipal District of Crown No. 395 endorse the motion of Mr. Zimmerman re Ponoka-Joffre road a District Highway.

The minutes of the previous meeting were read and it was moved by Parker that they be adopted as read.

Huopelainen: That the meeting adjourn to June 14, at 3 p.m.

June 14

Hall: That T. C. Woods application for license to sell lightning rods be approved by the Council.

Parker: That 8 1/2 of lot 3, Block 4, McLaughlin Subdivision be sold to W. F. Cree for the sum of Twenty dollars (\$20.00), purchase price to include cost of transfer.

Armstrong: That the fee be authorized to sign agreements with the Department of Public Works re Capital Grants.

Stewart: That the Council be instructed to write the University Hospital re Emily Noyes.

Huopelainen: That Mrs. Nora Cummings Mother's Allowance be increased to not more than \$40.00 per month.

Hall: That the Wild Land Tax be cancelled on the S 1-3 and N-W 26-41-26-4, \$89.36, for the year 1933.

Hall: That Huopelainen, Armstrong, Stewart and Hall be appointed to investigate the Austin proposition.

Parker: That Mr. Austin's proposition re Elevator be accepted.

The Secretary was instructed to write the department re Jessie Borden dental work.

Stewart: That the Councilors be paid \$100.00 each and the Reeve \$150.00 on account of fees.

Parker: That the Secretary be paid the first quarter of his salary.

Stewart: That Hall, Hald and Armstrong be delegates to Edmonton with Pettie Valley M.D., to meet the Government at the District Highway.

Parker: That the following tax consolidation applications be approved: N half and S.W. 23-49-27-4, S.W. 24-49-26-4, N. 23 and S.W. 34-49-26-4.

NEW SECRETARY APPOINTED

Ted V. Stone, of Alton, native Altonian, and honour graduate of McGill University in economics and political science, has been appointed secretary to Premier H. G. Reid. Mr. Stone has for two years been engaged in research work in Alberta for the McGill social science department. He won a name for himself as a university debater, and last year received his degree of master of arts from McGill.

MARKETING CONFERENCE

Arrangements are being completed for the marketing conference and co-operative institute to be held at Olds school of agriculture, July 24, 25 and 26, under arrangement with the surplus wheat board trust fund. It is expected that such eminent authorities as Hon. H. H. Stevens, federal minister of trade and commerce; Dr. J. E. Booth, commissioner of agricultural economics; C. G. Jones, minister of agriculture, will preside.

Dr. Budd left Sunday for Seattle, where he will attend a convention. Mrs. Budd who is visiting in California will meet the doctor there and both will motor home about the 26th.

ANNUAL FIELD DAY

The annual field day and picnic at the School of Agriculture, Olds, will be held on Saturday, July 21. Visitors will be taken over the field and forage crop plots and also be shown the herds of Shorthorn, Ayrshire and Guernsey cattle, as well as the horses, sheep and swine.

From Rimbey

The following are the results of the Toronto Conservatory of Music examinations in piano, held in Lacombe with Mr. Leo Smith as examiner. Mrs. D. H. Kennedy was their instructor.

Introductory Grade: Honors, Emil Roper.

Elementary Grade: First Class Honors, Gwendolyn Haldings, Mary Melis, Norma Raymond, Teddy George, Paul, Muriel White.

Primary Grade: First Class Honors, Melba, Joyce Jackson, Marjorie Haldings, Mary Melis.

Junior Grade: Honors, Elsie Grinde, Margaret Rimbey.

Elementary Theory: First Class Honors, Marjorie Haldings, Mary Melis, Honors, Gwendolyn Haldings.

Mrs. S. N. Rimbey has been on the sick list the past few days.

Dr. and Mrs. H. E. Haldin left on Saturday for a fortnight's holiday at Jasper and Maligne Lake.

Omaha-Nebraska

The marriage of Alice Marie, daughter of Mr. and Mrs. Chas. Neobes, of the Iowa district and Mr. Wm. Odenbach, son of Mr. and Mrs. Gottlieb Odenbach, Rimbey, took place July 14th, Rev. E. W. Coulter and Mr. Robert Wilton were the witnesses.

Mr. and Mrs. D. H. Kennedy left by motor on the 14th for a month's holiday. Mr. C. A. Baker, of Meadbrook is relieving at the C.P.R. station.

Mr. J. W. Barnett, secretary of the Alberta Teachers' Alliance attended a meeting of the board of trustees of Rynders R.D., 1615, on Monday evening. Mr. Barnett represented Mr. L. L. Gies, who refused to accept the ultimatum of the school board when it notified him that his contract had expired. Mr. Gies has appealed and will be heard at July 14th in Edmonton.

Mrs. H. B. Raper and children who are enjoying a two weeks holiday at Pigeon Lake, are expected home this week.

Mr. and Mrs. J. A. Batty and Mrs. Doreen Batty, who are at their cottage at Goose Lake, Gull Lake.

Mr. Stanley Morris, of the Bank of Montreal staff, is spending his two weeks holiday with his parents at Lethbridge.

Mr. O'Donnell of Edmonton was a guest of Mr. J. N. C. Myers on Thursday and Friday of last week. Mr. O'Donnell also visited with the J. Donovan family of Bluffton and with Mr. and Mrs. D. A. Stuart, east of Rimbey.

The most advanced wheat in this district measures 28 inches and is fully headed out.

The Women's Institute of Lethbridge is planning on spending a week at Sylvan Lake. A special meeting was held July 17th to make final arrangements.

The Misses Dorothy Newsome, Margaret Rimbey, and Phyllis Cooke are enjoying an outing at the United Church Camp at Meridian Bay, Gull Lake.

Mr. and Mrs. M. B. Tuckey left over the week end for a two weeks holiday. The Pool elevator will be closed during that time.

Rimbey Fair dates have been set for August 1st and 2nd. A full programme consisting of foot races, boxing and fast horses has been arranged. Dance and picture show in the evening.

Mr. and Mrs. Seth Wilton had as their guests on Friday, Mr. and Mrs. J. Perry, the Misses Doreen and Jean Perry, Mrs. Maxwell and Miss Smith, all of Laverne, Sask.

The newly organized U.F.A. of Hoodsdale, elected Mrs. Stan Aunger president and Mrs. R. McKenzie as secretary.

Mr. A. L. Tennant, a farmer of the Lethbridge district was given an option of a fine of \$300.00, or three months in Fort Saskatchewan last Thursday on a liquor charge. Mr. Leacock of the Lethbridge district was the presiding Magistrate. Mr. R. J. McClelland defended and Const. Warham conducted the prosecution. Mr. Tennant left the same evening for the "Bop."

MARKETING CONFERENCE

Arrangements are being completed for the marketing conference and co-operative institute to be held at Olds school of agriculture, July 24, 25 and 26, under arrangement with the surplus wheat board trust fund. It is expected that such eminent authorities as Hon. H. H. Stevens, federal minister of trade and commerce; Dr. J. E. Booth, commissioner of agricultural economics; C. G. Jones, minister of agriculture, will preside.

Dr. Budd left Sunday for Seattle, where he will attend a convention. Mrs. Budd who is visiting in California will meet the doctor there and both will motor home about the 26th.

GOVERNMENT CROP REPORT

All crops in Alberta are at present making good progress under more or less ideal growing conditions, with the exception of the east-central section where early drought and the heavy rains have left their mark, and where July rains have not been as heavy or frequent as in other areas. In this section the grain crops will be light.

Over most of the province the first half of July has brought considerable moisture, the rains having varied from occasional showers at intervals of a few days in many parts of Southern Alberta to frequent and heavy rain storms in central and northern areas. The result is a very satisfactory supply of moisture which, verges on super-abundance in some of the central and northern districts where the need of a period of warm weather is beginning to be felt, and where an extension of the present rainy spell would mean a serious retarding of crop development.

The past two weeks have been characterized by violent electrical disturbances and severe hail storms over a portion of central Alberta, but while the temperatures have dropped to low points in one or two of these districts, the damage has thus far not been severe or extensive.

Most of the wheat in the province is headed out and generally speaking is showing a good, healthy crop, with rank growth in some of the central districts. Coarse grains are also heading out and showing good progress. Haylage is progressing, and the aggregate crop will be fairly substantial, although light in a number of districts. Later feed crops are generally of quite heavy yields, and there is every indication of a very much improved feed situation.

There appears to be a more contented feeling among the rural population in the province, consequent upon the greatly improved general crop outlook. A very keen interest has been shown in the various field days held. There is a gratifying demand among farmers in central and northern districts for Yorkshire pigs, indicating the increased determination to improve the quality of hogs. Cattle are in good condition, but producers are somewhat anxious over the proposed restrictions in shipments of stock to the market places. Farmers in central Alberta finishing cattle under the rancher-brand contract system, have marketed their finished product in most cases to very good advantage, and have realized fairly well on the deal. Cattle production has shown marked increase for the first part of the year over last year's high record. Prices have been maintained on a fairly satisfactory basis, but weakness in outside markets has been reflected in somewhat lower price levels here.

WELL! WELL! WELL!!!

The editor of the Red Deer newspaper gave a little of his way to throw bouquets at Ex-Premier John E. Brownlee, who few readers will probably remember, was found guilty of seduction of one of the government's stenographers a couple of weeks ago. He says he has known Brownlee for many years and holds him in very high esteem, and does not believe he was guilty of the naughty things he was found guilty of. When it is considered that six responsible citizens of the Province listened to the evidence and brought in their verdict of guilt, which the judge also concurred in, the Red Deer editor seems to us to be most presumptuous. We also believe that eighty per cent. of the people of Alberta are convinced that the jury's verdict was a just and proper one, according to the evidence.

AND NOW O. L. MOPHERSON THINKS HE WAS MALIGNED

These U.F.A. leaders sure have a great sense of humor. Here is how O. L. Moperson thought his resignation to Premier Reid:

"Dear Mr. Reid: "Being aware of the existence of some public feeling as a result of persistent misrepresentation of my personal affairs, I consider it my duty to set the record straight, and earnestly desiring that at this time of reorganization of the government you should not be faced with any unnecessary difficulties, I must ask you not to include my name among your list of ministers."

PERSONAL

If you contemplate going to Toronto, would like to get in touch with you at Western Globe office.

Current Comment on the MacMillan-Brownlee Case

U.F.A. GOVERNMENT FINDS A DEFENDER

I have read some of your editorials advocating an election in Alberta. I take it you believe the U.F.A. has had its day—also the night. Now I think your attitude is very misguided. One should be more broad-minded, more judicious, about court cases in which leading men of our province are involved.

Personally I believe we owe a debt of gratitude to the U.F.A. government. These are dull, hard times, when anyone who can raise a laugh should be appreciated. In the old days, we had court jesters. The tide of jest is ebbing, but very funny that has swept Alberta during the past year, has been a boon to people, harried and worried by debt and unemployment. I must admit that these jokes are not parlor jokes but most of them are ideal for relating in jovial company. For instance, if one were parked on a lonely country road, with another man's wife or daughter, I am not a lawyer or judge, but as far as my limited intelligence goes, I take it that the final judgment, stated that it was O.K. to seduce a girl, providing that she did not become sick as the consequence of the seduction. What a break for the men of Alberta! We should have a new song for the west: "Out in the west, where men are men, and the women merely chasteles." Now, I am a woman and therefore I don't owe any thanks to the parties in the court case that ended in this judgment. But if I were a man, I would move a vote of thanks for this ruling. I predict that Alberta will have a mob of seducers, luring young girls in the old melodramatic fashion to their doom-fall. Why not? The man cannot lose and if the girl takes him for his money, he can make her pay all legal costs. I hope that all suitcases now realize how grateful they should be to this liberal attitude.

Alberta is growing. Away with old-fashioned standards of morality! We can lead Canada as the paradise for men.

Citizens of Alberta, should be grateful for the publicity Alberta is receiving. I remember when Matten, the round-the-world flier, was in Alberta. I read in the newspaper that he wanted to make his way not related to the matters involved in the divorce case in Edmonton. This man knew of Edmonton because of the advertisement Edmonton could get from this man on his travels. It is a marvelous opportunity for publicity. Alberta is now on the map and Edmonton can proudly rank with such places as Reno and Hollywood, the source of many spicy stories.

Now, Mr. Editor, if you will only consider, the foregoing, without prejudice, with an open mind, like a judge giving a judgment, you must admit that the U.F.A. has earned the right to govern Alberta for many years to come—indirectly through its virtue and interesting leaders.

I am not a leading cross-examination lawyer in Alberta, but I have tried to present the case of the U.F.A. government and some of the members. We owe them thanks for the laughter in these dull days, for pointing the way to a fuller and freer life and the publicity Alberta has received.

I hope your future editorials will deal with violent crimes like the high cost of peanuts in Iceland, and leave the U.F.A. alone.

MAE OUT WEST.
—Calgary Herald

THIS IS WORTH READING

The United Farmer, a sheet printed at the expense of the ratepayers of the Province to a great extent, has the following editorial in its issue of the 6th inst. The editor of The United Farmer has indignantly given his conscience a holiday.

"Decency or Rule?"

"The time has come for the farm people of Alberta and all their chosen leaders to take off their gloves and fight."

"The fight cannot be a gentlemanly one, because their enemies will not have it so. It will be a rough and tumble fight, with no quarter given by the major force arrayed against us—a force which ticks all some of honor and public decency. It must be a fight to a finish."

"The choice before the people of Alberta lies between a continuance of efficient, clean and honest government, free from the shadow of suspicion of corruption and government by political thugs who have shown that they will not hesitate to stoop to any depths to gain control of the treasury and the public domain, for the benefit of a hungry pack

who in social morality differ little from the racketeers of Chicago except in the inferior quality of their personal courage."

We will leave it to our readers if the above leading editorial in The United Farmer is not the equal of the worst sometimes appearing in the most hide-bound partisan newspapers. Are over half the people of Alberta "thugs"? The United Farmer says they are.

And notice the brilliant touch about a "sense of honor and public decency." Also that snappy line about the government being "free from the shadow of suspicion."

ONE EDITOR GOES LOCO

The Editor if The United Farmer is evidently trying to earn his money and comes out very strongly in defence of Ex-Premier John E. Brownlee, whose conviction of seducing a government stenographer is still fresh in the minds of our citizens. We have read articles of a similar nature in some of the yellow journals and tabloids of the big American cities, when the editor stoops to whitewash some hard leader or bootleg gangster, but it is new reading for the respectable citizens of Alberta. If the article below is not of a very libelous nature, we miss our guess. More will be heard of it in the near future.

THE CRUCIFIXION OF JOHN E. BROWNLEE

By the verdict of the jury in the suit against the Hon. John E. Brownlee, a great wrong was done. It was done to a man whose private life has been distinguished by an extraordinary degree by a fine delicate and sensitive mind, and up to the highest standards of personal honor.

A verdict given against him on evidence which no body of determined men who were not either members of "freemasonry" blinded by political or personal rancor, or carried away by the influence of mob hysteria, would hang a yellow dog.

The verdict was a terrible miscarriage of justice.

Every newspaper in the Province, every citizen who possesses the capacity to weigh evidence, knows this to be the truth. Brownlee has been crucified on the altar of the black mass of economic greed, and political hatred fanned by certain sections of the daily press.

For the creation of mob hysteria in two daily newspapers which combined lack of accuracy and veracity with a certain skill in the art of playing upon the strings of unworthy passion, prejudice, and unreason which human nature at its worst is prone, have been mainly responsible. One, the Edmonton Bulletin, has boldly and shamelessly made its appeal to these unworthy motives before, during and since the trial.

The other, the Calgary Herald, reserved its stores of venom until after the verdict of the jury had given it license for the moment for a course of action which the Herald must know to be a violation of every standard of ethics and decency. The Bulletin's method are those of the ordinary gutter press and thug. The methods of attack preferred by the Herald are those of the oily, hypocritical assassin—of a Peckemiff with murderous proclivities; murder—because the Herald must be fully aware that the man whom it seeks by cunning upbraid to consign to moral perdition, is a man against whom no credible evidence of the slightest departure from the observance of the high standards of behavior for which he is honored by his friends, has been adduced.

The editor of the United Farmer should remember that Judge Ives was satisfied with the seduction verdict—the amount of money damages only being set aside by him. And the chances are that the money damages will be awarded by a higher court. The fund for the MacMillan appeal is growing daily, and is now well over \$2,000.

CONSERVATIVES NEVER DO DISGRACE THEMSELVES

Telling of the reference made to the Brownlee case in Alberta by the general public, The United Farmer made the Conservatives a beautiful bouquet:

"That Conservative generally have not disgraced themselves by this sort of thing. That in fact cases their attitude in regard to the whole matter does them credit, and has earned the respect of decent people."

Experienced housekeeper wants work as housekeeper on farm. Apply this office.

WE'LL PROVIDE THE CHEVROLET

for you to make
THESE 18 TESTS
today

COMPARE THE KNEE-ACTION

Chevrolet is the only car in its class with fully enclosed Knee-Action—protected from wear and tear, dirt, flying stones!

TEST ITS BIG, POSITIVE BRAKES

The world's biggest brakes are cable-actuated. So are Chevrolet's equal-action, weatherproof, positive-acting brakes.

SLAM THE DOOR FOUND THE BODY

No shiny clang when the door swings to. No shiver or shudder when you pound the Fisher Body. No "drumming" vibration as you drive. And the roof is a built-up structure... not a makeshift of wire netting!

NOTE THE SAFETY GLASS

... in windshield and ventilators of all Chevrolet models. No extra cost!

TRY THE BUILT-IN VENTILATION

Note that it's not a make-shift, but the Fisher built-in system. No drafts! No rattles! Keeps out rain! Scope in summer breezes, when desired.

A GENERAL MOTORS VALUE

DRIVE A NEW

TRY "SILENT SECOND"

... to quiet you can "pick up" to 40 in second with never a whisper from the gears. Synchro-Mesh clutches shifting, of course!

SPEED UP A HILL

No need to "surge" the engine, because Chevrolet has the weight plus power to take you flying over the top in record time!

LEVEL OUT THE BUMPS

Chevrolet's Knee-Action Wheels have ended bouncing, pitching, jarring. Your ride is now a glide!

"WEIGH" THE VALUE

The economical Chevrolet is the best car in its class, for extra comfort and dependability!

TRY THE BACK SEAT

... you feel alone. No bumps, no tossing. Just like up in front—with plenty of head and leg room!

REST AS YOU DRIVE

... right down to adjustable driver's seat. Chevrolet is built for ease, comfort and convenience.

TRY "STARTERATOR"

PARK WITH EASE

TEST ITS SPEED

Turn the key, press on the accelerator pedal, and the engine starts automatically! "Park" with finger-tip effort, thanks to lighter (and shock-proof) steering. As for speed... you're as comfortable as "top" as at 10! No noise! No vibration!

THEN LISTEN!

Idling, or racing along the straightaway, you'll never hear the Chevrolet engine. Because Chevrolet has spent more years perfecting the low-priced six-cylinder car than any other manufacturer!

COMPARE THE PRICE

Master Six Standard Six

\$844 up \$710 up

Delivered, fully equipped, at factory, exclusive of tax, license and delivery charges. New low time-price on the GMAC Plan.

Mr. Hal Laird,

Laird Motors,

Lacombe, Alta.

Dear Mr. Laird:

I thought that perhaps you would like to hear that the Chevrolet car I purchased from you when I was in Rimby, has worked beautifully and has never given us a moment's bother. I had one puncture on the Painted Desert of Northern Arizona and Roy was not changing wheels. I would rather change wheels in Rimby mud. Today it is 113 degrees in the shade, but cannot find the shade.

With kind regards,

(Sgd) Ted George.

P.S. I believe it takes some time to stand up on these sandy trails in each heat. T.G.

Take Advantage of Good Weather for Harvesting!

The John Deere Tractor Binder Saves Time and Labor

Harvest days are uncertain days so far as the weather is concerned. But when you reduce by half the number of days required to cut your grain, you reduce your chances for loss by a considerable percentage.

With the John Deere Ten-Foot Tractor Binder, you can actually cut twice as many acres in a day as you can with an eight-foot horse-drawn binder. That's a mighty big advantage, you know. You cut when the crop is just right—you get the grain into the shock when the weather is right. Likewise, you make an appreciable saving in time and labor.

With the John Deere Tractor Binder you are better equipped to handle heavy crops and crops that are tangled or down. In wet ground and in loose soil, too, this binder handles the harvest faster, easier and with less waste. The reason for this is that the speed of the binder mechanism is controlled independently of the speed of the tractor, assuring steady operation under any condition.

Standard John Deere high-quality materials, workmanship and design assure trouble-free service and long life.

There are many more improved features. Drop in and let us explain them to you when you are in town.

MARRIED

Kievit-Abbott
A quiet wedding was solemnized at the First Baptist Church in Calgary, on July 14, of Miss Blanche Keith, daughter of Mr. and Mrs. S. C. Abbott, of Lacombe and Mr. Harry Kievit, of Shastoon. Mr. and Mrs. Kievit will make their home in Shastoon after a short vacation.

GULL LAKE

The Mirror Girls Club have just concluded a two week's vacation at the lake, and they will be missed by everyone, as they could always be depended upon to keep things rolling, and their soft ball playing was nothing short of sensational. The club members were Jeanne Spence, Alison Spence, Ruby Heumann, Velma DeVore, Isabel Cairns, Barbara Walker, Edna Walters, Ina Conway, Mildred Cavanaugh, Hilma Moller, (leader). A large crowd of fans saw the Gull Lake Girls defeated by Lacombe Girls in a good softball game last Sunday. The score was 17-15.

DARK OF MOON IS FATAL HOUR FOR THISTLES

Following a series of experiments over a term of years, farmers of the St. Albert district believe they have at last solved the problem of ridding their land of Canadian thistles.

And it's simple. All it means is that by cutting, pulling or plowing them under in the "dark of the moon" in July and August they can free the land of this "farmer's curse."

The seven centre days of the last quarter of the moon is the time they have decided for the attack on the thistles and, preferably, the centre three days of the seven. The work to be effective must be done in rain or shine, and if summer fallowing is being carried out, the cultivator must be put through the land a little deeper than would be the case in plowing. In order to get the best results the work must be completed in the period mentioned. It is stated that this holds good for any weeds, and farmers who have watched the experiment closely say that it is effective.

De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature. It can scarcely be called a characteristic distinguishing homo sapiens from the beasts of the field or fenside, for the domestic cat or dog (to mention species coming within the range of everyone's experience), shows a strangely similar capacity when confronted with something strange in its immediate environment. By test of paw or teeth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments it is true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for this outburst. Strange, very aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series—a thrill which became familiar in everyone's mouth under the euphonious title "Ogopogo." The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange denizens of remote waters, which, christened "Cachoeira," to the credit of its habitat, Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public, during its brief occupancy of the spotlight, as have the Quebec quintuplets of more recent and certain origin.

France next came to bat with a claim on behalf of its particular pet, seen as through a glass darkly, but acclaimed a monster, a freak, a lusus naturae, or a throwback. The world was agog with speculation as to what manner of things these weird creatures were. The sea serpent of myth and anecdote never attained such repute as the new genera. The sea serpent was too easily explained. It was either a snake which had strayed from its forest lair to essay adventure on the briny deep, or it was the gnarled and twisted trunk of a fair sized sapling which ocean currents induced with similitude of life.

This was less easily explained. Its discovery, whether in British Columbia, France, Scotland, Brazil or elsewhere—all stressed the fact "Ogopogo," "Cady," or what-have-you, was different! Scientists were interviewed by representatives of the popular press and, in unguarded moments suggested it was a relic of pre-historic times hurled across the ages, in some inexplicable way, into A.D. 1933 or 34.

It is to be regretted that Scotland should have been visited by one of these unknowns. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to vain imaginings and uncanny visions, but in his normal state, he is, essentially, "from Missouri." Loch Lomond, which has induced many poems, caught the fashion. It produced a freak seen from its "bonny banks." But when Loch Ness sought to uphold the dignity of salt-water—was too much for the practical race north of the Tweed. It (the Loch Ness monster) was photographed—and strange, indeed, it looked! A scientist subjected the picture to piercing scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the fluke of a killer-whale, too modern an animal, foresooth, to be acclaimed in competition with the million year throwbacks which imagination had created.

Until another wave of freak discoveries hit the pages of our newspapers, then, we must content ourselves with Alley Oop's dinosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder.

Air Base For Bermuda

Regular Service Planned Between Quaint Islands And

Bermuda is going right ahead with its provisions to establish an air base. Legislation has been prepared to assist Imperial Airways to operate a regular service between these islands and the mainland. The two islands, Durrell's and Burt's, part of Warwick Parish "vested in her late Majesty Queen Victoria her heirs and successors forever for quarantine purposes," have been appropriated as landing bases.

The government would contribute \$15,000 for construction and equipment of the port, according to the bill before parliament.

A maximum of 13,000 would be paid to Imperial Airways each year for upkeep of the flying service. The sum would be paid to that company either alone "or in conjunction with another company or organization giving service by aircraft between these islands of the North American continent."

Wins High Marks

Japanese Girl Scores High Rating At B.C. Musical Festival

Yuki Yoshida, Vancouver Japanese girl, scored a remarkable 297 points of a possible 300 in winning class 125 of the British Columbia musical festival election tests.

"For the first time in my life, I have given a competitor a perfect score," said Adjudicator Dr. James Lyon, after he had awarded the girl a full score for the final test. "The work of this young girl is the finest of its kind I have ever heard."

Miss Yoshida won the British Columbia dramatic school championship cup.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and often times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

X-Ray Motion Pictures

Newly Perfected Camera Shows Bones In Process Of knitting

Broken bones are now shown in the process of knitting by x-ray motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer at the University of California. Doctor Pillsbury's camera works on the same principle as the one used to photograph the unfolding of flowers, taking a series of snapshots at intervals of a movement imperceptible to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments. The first motion picture made with the x-ray camera showed the growth in the interior of a roe. It took seventy-two hours to film, as only one picture at a time could be taken in intermittent exposures. The film, Doctor William D. Coldridge, inventor of the Coldridge tube, designed a special x-ray tube.

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing. We do not want to be too long in writing him, but he is so old, and he has been suffering from rheumatism. This is what he says in his letter.

"Three years ago I was in bed for six weeks with inflammatory rheumatism. Since that time I have been taking Kruschen's Salt, and have not had another attack. But my hands are still somewhat stiff. I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years. Excuse this writing, as I am ninety years old, and use both hands to write."—J. R. G.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of all rheumatic troubles. It does this by dissolving crystals clean out of the system. Then if you keep up the "little daily dose," excess uric acid will never form again.

Postal Rocket Tested

Will Speed Delivery Between Britain France And Ireland

The world's first postal rocket has been tried near London by the postal authorities and judged successful.

Deep secrecy veiled the experiment with the rocket which, invented by Gerhard Zuecker, German expert, was said to be the forerunner of a service calculated to give Great Britain one-minute postal contact with France and three-minute contact with Ireland.

The rocket will carry 1,200 letters, bearing special stamps, it was learned. It will be trained on Calais from Dover, or else across the Irish Sea, and the letters will be posted at the nearest postal point to where the rocket falls.

The speed of the rocket is estimated at 20 miles a minute.

It costs just as much to buy an apple in London as it does in London as it does in some parts of British Columbia. This is another of those "Believe It or Not" statements but it may be believed because it is absolutely true and the mischief of the situation is that there is no immediate method of remedying it. It does seem absurd that, while apples are grown by the millions in one section of this province, still so far as another section just a few hundred miles distant, is concerned these apples might as well be grown on the canal river face of Mars—Country Life in B.C.

Queer Thing About Prices

B.C. People Pay As Much For Apples As Londoners

It costs just as much to buy an apple in London as it does in London as it does in some parts of British Columbia. This is another of those "Believe It or Not" statements but it may be believed because it is absolutely true and the mischief of the situation is that there is no immediate method of remedying it. It does seem absurd that, while apples are grown by the millions in one section of this province, still so far as another section just a few hundred miles distant, is concerned these apples might as well be grown on the canal river face of Mars—Country Life in B.C.

Experimented Two Years

Watchmaker Drilled Hole Through Pin From End To End

Henry Huss, watchmaker for the past 25 years in Meaford, Ontario, has succeeded in drilling a hole through a common pin from end to end without breaking it. Huss has been experimenting for the past two years, and the hole made with a fine drill is just large enough to thread a hair out of a man's head through it. The pin was put on display in his window and caused a great deal of interest. It is believed this is only the second time this has been accomplished in Canada, a watchmaker in Toronto having succeeded in doing it.

All the most injurious grasshoppers in the province are the skins on an average of five times during the course of their development. The grasshopper's skin does not keep pace with the growth of the insect, so this pest goes through the several processes of moulting by bringing up-side down attached by its legs to some support and slowly wriggling out of its old coat.

"I don't know what to make of the lettuce in my garden," says a correspondent. He had better consult a salad recipe book.

There have been no major changes in outlines of the oceans and continents since earliest times.

Dr. Wernert's Powder For FALSE TEETH

A Joy To All Users Can't Slip Or Slide

Sprinkle Dr. Wernert's Powder and you won't have to think about your false teeth all day long. Joyous comfort yours. And any time you want it holds plates firmly in place. They positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy residue—keeps mouth sanitary, breath pleasant. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any drugist.

Means True Progress

Streamline Train Promises Railroads New Lease Of Life

M. E. Tracy in an article in the New York Times-Telegram, says that the streamlining of passenger trains, together with baggage, and express 1,000 miles in thirteen hours and on \$17 worth of fuel is something new. It promises the railroads a new lease of life, capital, new enterprise and labor, new work, new life, all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting little has occurred to this point. By and large, we have been forced to fall back on the hope that the best which could be done was to rearrange what they had on hand.

Progress, which should be considered as synonymous with prosperity, is not made of that kind of stuff.

We are not going to find better living conditions, much less happiness, by doing what we have always done in a different way. That is where political remedies fall.

Progress is a matter of invention and achievement. Take this streamline train, for example, what does it imply? It implies the scrapping of billions in rolling stock, the substitution of crude oil for coal, the abandonment of steam locomotives for Diesel engines, a great consumption of aluminum and a reduced consumption of steel, different operating and mechanical methods, the mobilization and training of new crews and a multitude of other drastic readjustments.

Cenotaph Dedicated

Canadian Legion Holds Impressive Service At Portland, Oregon

Flags representative of the United States, Great Britain and Canada, fluttering from a single flagpole, symbolized peace among English speaking nations at a memorial service of the British Columbia and the Canadian Legion. This service was the high point of the day's Rose festival program at Portland, Oregon.

To those of both Canada and the United States who died in the World War was dedicated the permanent cenotaph, from which the flagpole sprang.

"This is a gesture of international friendship," said Brig.-Gen. Alex. Macdonald, president of the legion. "It is perhaps unique because this is the first time a nation has erected a memorial to both the dead of a neighboring nation and its own dead."

A copy of Royal Canadian Mounted Police drew great applause when they marched on foot in the Canadian legion parade. Kilted bagpipers, drum corps and legionnaires paraded with uniforms and colors of two nations.

Makes New Engine

Invention Of German Engineer Run By Sea Water

An engine that will enable ships to run on the sea-water in which they float has been made in Britain by a German engineer. The engine, it is claimed, will revolutionize all forms of water transport, and new developments may make it practicable for use on road and rail. A British company has been formed to develop the invention. The first use to which the engine is being put is to enable submarines to use sea water in their engines, increasing their range at most indefinitely.

The average cost of producing hay on the Dominion Experimental Farms in the Prairie Provinces has been \$8.99 per acre, or 6.23 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred in different experiments, the cost per acre having ranged from \$5.93 at Swift Current to \$11.19 at Morden, while the cost per ton has varied from \$4.47 at Brandon to \$8.42 at Indian Head.

The supply of gossip seems never to equal the demand.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods a woman needs a new sense of life. She can depend on that. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

United States, Brazil and Mexico are three most populous nations in the western hemisphere.

London's Romantic Mile

One Business District Where Women Are Never Seen

Women are asserted to have penetrated every place of business to compete with men in the world of commerce. It is true the aid of women is accepted in almost all trades, crafts and businesses. Nevertheless, there are yet left sections of populous trade in the world in which women are never seen. Nor do they stay away through fear of any menace or trouble. There is one romantic mile in the city of London, capital of an empire, in which women are never seen. Until it is pointed out to them never recall the fact that they never met a female in bustling Upper or Lower Thames Streets in London. This street is hedged by the River, and runs from south of St. Paul's cathedral to Tower Hill. It is a hives of industry amid forbidding warehouses, dull streets and meagre, uninviting lanes. There isn't a threat in it—save to sunshine. It is a mart for draymen, automobiles are scarce there, but it is one of the wealthiest and busiest streets in the world without the presence of women. They could go there—but well, it just isn't done. They have no business there. That has become one of the unspoken laws of London, according to Cockayne—Brandon Sun.

New Brick Invented

Made Of Cement Composition And Has Many Advantages

The London ministry of health has approved a new brick which is made of cement, and has many advantages. It has been evolved by two Englishmen, and the ministry has promised to notify all local authorities of its qualities.

The bricks, made of a special cement composition, are four times the size of the ordinary type. They can be manufactured in any color. They have double ventilation cavities, which give resistance to damp, dry rot and sound and also maintain even temperature winter or summer. They are made in the form of the double letter "H". They interlock, and can be used for constructing the whole of a building, including floors and ceilings.

Bricklaying time and labor are cut by 75 per cent. with the new brick, while an 80 per cent. saving is achieved in the use of mortar or cement.

The brick can be manufactured in twelve hours instead of the five weeks required by the old method of clay. The invention is the result of the combined researches of a British architect, J. J. Hine, and W. A. Fox-Strangways.

Honor For Woman Physician

Elected A Fellow Of Royal College Of Physicians In London

For the first time for 400 years a woman physician has been elected a Fellow of the Royal College of Physicians.

This honor has been awarded Dr. Helen Macpherson Macbride, one of the greatest British authorities on children's illnesses. She is physician to the Queen's Hospital for Children, London, a member of the staff of the Medical Research Council, a member of the Royal College of Surgeons, and a fellow of the Royal Society of Medicine.

Dr. Macbride specializes in dietetics for children and in the treatment of rickets and anaemia. Some time ago, after five years' research work in the poorer quarters of East London, she and her colleagues at the Queen's hospital discovered a simple and cheap remedy for infant anaemia which has brought health to hundreds of children.

They found that the addition of iron, together with ammonium citrate, to a normal milk diet for infants, prevented and cured anaemia, raised the resistance to infection, and improved the rate of growth.

An Unusual Hobby

Englishman Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Kitchener of Khartoum, Major Pat A'Beckett, of Ye Old Plough Inn, Speen, a Buckinghamshire village, owns the largest collection of match-box tops in the world. He has 22,000 different tops, and they cover every available inch of space on all the walls in three rooms at his home. He has been collecting them for many years, and has travelled almost the world over in search of new designs. He has some of the first match-boxes which came into use, and a history of world progress can be traced in the colorful designs on the match-box covers which form a unique wallpaper at his country inn. A few years ago, ex-King Alfonso, who is also an enthusiastic match-box top collector, paid a visit to Major A'Beckett and spent several hours inspecting his collection. But King Alfonso's collection was limited to a mere three thousand!

At a public dinner in London the chairman hoped that "The visitors will carry away with them some interesting souvenir of their presence this evening."

United States, Brazil and Mexico are three most populous nations in the western hemisphere.

Seeking Formula To Control Wheat Exports

Young Albertans Now Playing Alchemist For Wheat Growers

Like an alchemist of old seeking a formula for transforming base metals into gold, a young red-headed Canadian, in a modern setting, is searching for a formula which will effectively control wheat exports and establish a minimum world wheat price system.

Andrew Cairns, product of an Alberta farm, University of Alberta graduate and wheat pool statistician in turn, has won distinction unique as chairman of an international wheat commission created to better the lot of farmers of five nations.

Through his interpretation of complex wheat production problems, "Andy" has won appreciation and praise from United States and European co-workers. Quiet-spoken, deliberate in his thinking, this 35-year-old student from the Canadian prairies understands the language of the wheat rancher and has found his niche in directing the distribution of a world wheat supply under the London wheat agreement.

His genius for organization has brought him a personal power where world wheat prices are discussed. At Rome and at London he has matched wits with the shrewdest wheat traders of four continents. Through his devotion to an ideal, a world-wide upheaval is being moulded into an economic entity.

He is the possessor of a doctor's degree from the University of Minnesota, but it was under the watchful eye of Dr. F. J. Birchard, in the research laboratory of the board of grain commissioners, that he capitalized on his start with the Alberta wheat pool.

For Women's Rights

Montreal Lawyer Favors The Franchise For Women

M. Prud'homme, a stage character, adorned by the Paris populace during the last century because of the fine surrounding plaudits he uttered on occasions of his visits to the province of Quebec, in the opinion of Robert Dufresne, Montreal lawyer.

In an address under the auspices of the League for Women's Rights, Mr. Dufresne entertained his hearers with an account of the manner in which this personage defines the place of women.

Mr. Prud'homme is in the Quebec legislature, Mr. Dufresne declared, and writes to the newspapers under a variety of pen names. With his plumed position on the theme "Woman's place is in the home," he is the greatest enemy of woman suffrage.

As for woman in the home, Mr. Dufresne considered her admirably suited to that place when she placed the new brick in the wall. But she is to be walled up alive? he asked. Should she remain apart from the many problems that closely concern her and her family?

And what of the woman who has no home, and never will have one? Mr. Dufresne asked. He pointed out that there are in Canada 685,000 women earning their own living, and in some cases supporting relatives. In the province of Quebec alone there are 202,000.

Australian Poet Honored

Bust Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay Gordon, national poet of Australia, who has been honored by his bust being placed in the Poet's Corner of Westminster Abbey, by the news that he had lost the poet so honored since Tennyson, beside whom his bust stands.

A memorial volume by Mayor Douglas Sladen, on whose petition the monument has been erected, has been published, giving the story of Gordon's eventful life, his one love affair, and his tragic death.

Gordon sailed to Australia "in the wild days" and "became successively a mounted policeman, a horse-broker and trainer, a member of parliament, and the most famous steeple-chase rider Australia has ever known."

He died by his own hand in 1870, burdened with debts, and depressed by the news that he had lost the case for the recovery of his ancestral lands (as head of the Gordons of Hailhead in Aberdeenshire) he went out into the scrub and shot himself—the day after he had published his book of poems, "The Ballads and Galloping Rhymes."

Use For Old Mines A novel use has been found for abandoned mines. The British Columbia Chamber of Mines has received from a Toronto man and his two associates an inquiry as to where old mines may be obtained in which to grow mushrooms.

In Fiji, boys are taught by their fathers the stage tricks of the circus, being a practice to prevent the boys from becoming cowards.

A gust of F. at 81 miles an hour, registered at Croydon in 1929, was the highest wind velocity ever noted in or near London.

Light rays, X-rays, heat rays and wireless rays all travel at the same speed but vary in length.

COLIC PAINS Ended!

"If my baby has been restless with a fever, or if I have a colic, or if I have a headache, or if I have a stomach ache, or if I have a backache, or if I have a toothache, or if I have a sore throat, or if I have a cold, or if I have a flu, or if I have a pneumonia, or if I have a tuberculosis, or if I have a cancer, or if I have a leukemia, or if I have a lymphoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fibroma, or if I have a myxoma, or if I have a chondroma, or if I have a osteoma, or if I have a sarcoma, or if I have a melanoma, or if I have a glioma, or if I have a meningioma, or if I have a neurofibroma, or if I have a schwannoma, or if I have a hemangioma, or if I have a lipoma, or if I have a fib

Research Laboratories Investigate Possibilities Of Using Wheat For Manufacture Of Fuel Oil

Seeking new uses for Canada's now over-abundant supply of wheat, scientists are investigating the possibility of using 25,000,000 bushels of wheat every year to drive motor cars. After further study of the possibility of using alcohol made from grain as a motor fuel the national research laboratories have issued a revised report bringing the information available up to date.

If one-tenth of the annual consumption of motor fuel in Canada were replaced by alcohol made from wheat, the report estimates, some 25,000,000 bushels would be needed. A survey shows the use of mixed motor-fuels is increasing in Europe and is being seriously considered in the United States.

In a discussion of this possibility the report estimates it would increase the cost of motor fuel by approximately 100¢ or three cents a gallon, assuming the use of No. 5 wheat at 80 cents per bushel; Fort William wheat at 90 cents per bushel. Engine tests carried out in the national research laboratories with mixtures containing 5, 10 and 15 per cent. alcohol show that alcohol is an excellent anti-knock agent. The 15 per cent. blend gave somewhat more power than gasoline alone but fuel consumption is higher. It is suggested the use of alcohol might render unnecessary the importation and use of tetra-ethyl lead as an anti-knock compound.

In the near future motor fuel made by the hydrogenation of coal may also be a competitor in the motor fuel market, the report notes. This will be finally demonstrated in the course of a year or two as a result of a plant being built in England under a subsidy arrangement with the British government.

Theory On Hay Fever

New Explanation Given By University Of Michigan Doctor

A new explanation of hay fever, showing that it may come from crowded contacts of modern life, was reported by the American Medical Association by Dr. Reuben L. Kahn, University of Michigan.

In these contacts the body meets an increasing bombardment of germs, and develops higher powers of resistance. But it becomes so accustomed to fighting off "antibodies" that it sometimes mistakes harmless things like dust for enemies and sets its "protective mechanism" into action against them.

This protective mechanism produces surface irritation, the sign that the "antibody" guards are trying to throw out the irritating substance the same as if it were a deadly disease. The membranes of nose, throat and lungs are especially good at this kind of resistance, and account for puzzling features of hay fever.

This explanation of hay fever is based upon Dr. Kahn's discovery, for which the American Association for the Advancement of Science recently awarded him its annual \$1,000 prize, that the skin and body linings are able to resist infections even better than the blood, and that the visible evidence of this resistance is redness and irritation.

All Have One Defect

Plans To Make Over Society Forget About Human Nature

Ellis Rood, one of the foremost American jurists and statesmen of this generation, once said: "All my life people have been coming to me with plans to make over society and its institutions. Many of these plans have seemed to be good. Some have been excellent. All of them had one fatal defect. They have assumed that human nature would be better in a certain way. If it would behave in that way these plans would work, but if human nature would behave in that way these plans would not be necessary, for in that case society and its institutions would reform themselves."—Toronto Mail and Empire.

More "Conscience Money"

J. H. Bertram, collector of customs at Toronto, has received a letter containing \$35 and a small slip of paper with only two words, "conscience money". The money was forwarded to Ottawa to the credit of casual revenue. "It is seldom that we get a letter with no address and no explanation," Mr. Bertram said.

Makes Channel Flying Safe

A minimum of hazard is assured planes crossing the English Channel now. The world's first commercial micro-ray radio service between Lympne (Kent) and St. Inglevert (France) has been installed to add to the safety of cross-Channel flying.

On an average of once a week somebody gets killed in England by falling out of bed.

A radio-typewriter capable of sending 200 words a minute has been perfected.

Wheat Stem Sawfly

Pest Has Spread Over Greater Part Of Prairie Area

The wheat stem sawfly which is now a pest of Western Canada was originally confined to those areas known as the "long grass prairie" and was unable to enter the short bunch grass of the open prairie. However, says Mr. E. L. Beaman, entomologist in charge of the Dominion laboratory at Lethbridge, with the breaking up of this latter type of grass and replacing it with wheat, the sawfly was enabled to spread throughout the greater part of the prairie area. The widespread production of wheat has also aided in the increase in the numbers of the sawfly more rapidly than would have been possible under natural conditions, and has resulted in frequent outbreaks which have caused serious losses to wheat growers.

The adult sawflies lay their eggs in stems of grains or grasses during the last of June and early July. Only those stems which have headed out or are about to head are chosen and the eggs are laid inside the hollow portion of the stem. The larvae hatching from these eggs feed up and down the inside of the stem throughout the season. There is seldom any outward sign of infestation, but, if the stems are split open, the hollow centre will be seen to be filled with fine dust and the very root of the plant will be found somewhere in the stem. Several eggs may be deposited in one stem but only one larva survives therefrom to reach maturity. As the stem matures, the larva works its way to the base, tunnelling the stem to the very root of the plant. If the stem is cut, the larva of the insect just about the level of the soil, retreats below the cut, and plugs the stub with the "dust" made in feeding. The upper portion of the stem breaks off and falls to the ground. The larva spins a cocoon which lines the entire portion of the stub and spends the winter there. As the soil warms up in the spring, the larva changes to a pupa, from which the adult emerges late in June. Both the larva and the pupa are fairly active and can move up and down inside the stem. This enables them to retreat sufficiently below the soil surface to avoid unfavourable conditions of temperature or moisture.

Gift From Nova Scotia

Freestone From Province House For Fireplace Of States

A piece of freestone taken from the site in Halifax of the first representative assembly in North America will form the keystone of a "Fireplace of States" to be constructed in a tourist information bureau under construction by the United States government at Beauséjour, Minnesota, the centre of the American northwest. This was announced by Hon. Michael Dwyer, minister of public works and mines in the Nova Scotia government.

The request for a piece of stone from Nova Scotia was made by the civil works administrator of the United States department of labor. For the building of the fireplace stones are being secured from every state of the union and from every province in Canada. For this purpose Mr. Dwyer selected a piece of freestone taken from the site of the first representative assembly.

The inscription on the stone reads: Nova Scotia, Canada. Freestone Removed from Province House, Halifax. Seat of First Representative Assembly North America. October, 1758.

The memorial was sent forward accompanied by suitable literature. It will be seen by thousands of tourists yearly and will be a reminder of Nova Scotia's place in political history and a perpetual advertisement of the province.

Ship Lumber Via Churchill

The Dominion will assist in developing the lumber carrying trade out of Port Churchill through Hudson Strait to the United Kingdom, it was learned when the supplementary estimates were presented to parliament. An additional amount of \$200,000 will be provided under the heading of ocean and coastal subsidies "and to assist in the carriage of lumber from Churchill to the United Kingdom."

Nowadays, the variety and number of engineering studies to be made in increasing the efficiency of the farming industry and the enjoyment of farm living is amazing, more than 400 research problems being listed for study in farm mechanical equipment alone.

"Yes," prattled the elderly lady, "that is the duke and duchess; the couple behind them are the mayor and mayores, and those on the right are the vicar and the vicar-vixen."

Justice seldom exceeds the speed limit.

When Is Wealth

No Surplus Of This Commodity Says Henry Ford

There is no wheat surplus in the world to-day, Henry Ford said in an interview with the Financial Post. "The world could use many times as much wheat as it grows today," he said.

"When is wealth," he continued. "The wheat surplus is a direct challenge to learn more ways in which to use wheat. The trouble is everybody thinks of wheat in terms of money. They raise wheat in order to buy money with it. That is putting the cart before the horse. The wheat is wealth; the money is merely part of the conveyor system which passes the wheat around."

The automobile magnate said there may be a score of uses for wheat waiting for someone to discover. "Yet with all the magic of an unvalued future in every kernel of wheat we tell farmers that they must grow less of it and we try to raise the price so that people cannot afford to buy it," he declared.

"There never was a crasser notion than the idea that there can be too much of anything," he continued. "There is need right now in the world for all we can produce of every useful commodity."

Caterpillars Strip Trees

Branches Eaten Bare In Wooded Country Near Fort Frances, Ontario

The wooded country along the Canadian National Railways Fort Frances line, between Shebandowan and Atikokan, Ontario, have the spectral appearance of mid-winter, as poplar, aspen and cottonwood trees, stripped of their foliage by green caterpillars, raised bare branches to the weather.

The caterpillars are reported to be so thick in the infested area that they cover railway tracks as they swing their offensive from side to side over the right-of-way.

Trains have been delayed several hours, owing to the crushed bodies of caterpillars making the rails so slippery that locomotive driving wheels were slipping and gripping. Most difficulty is experienced after trains have come to a full stop and then attempt to get up speed.

A Scientific Feat

Rejuvenation Process For Seeds That Makes For More Rapid Growth

A scientific feat that is almost the equivalent of abolishing winter—a new kind of rejuvenation process for seeds that promises to be of immediate benefit to the farmer—has been accomplished by the United States department of agriculture.

It has found that the longer wavelengths of light, the red, orange and yellow rays, have the almost miraculous power of rousing seeds from their winter dormant state, a sort of living death, and start them growing several months ahead of schedule. This new process of "near-resurrection" was discovered and developed by Dr. L. H. Flint.

Water Shortage In London

City Has Only About Three Months' Supply In Storage

London tube trains and buses are plattered with notices urging economy in the use of water, as no prospect is seen of any material rainfall. Some anxiety exists in several small centres where, if the dry weather continues, assistance may be sought from other municipalities.

London itself has about three months' supply in storage.

Beating The Law

How the law is beaten as told by a Kansas paper. A travelling man says he called the attention of a western Kansas hotel man that it was against the law to use roller towels. "I know it," said the land lord, "but that towel was used before the law was passed and the law is not retroactive. The law has been in the books over 20 years."

Grumbler: "Why, the sleeves of this coat are a mile too long."

Tailor: "How much shall I take off?"

Grumbler: "About half-an-inch."

A DARING LITTLE FROCK OF FRENCH INSPIRATION FOR DAUGHTER GIRLS

Small girl frock of good taste, necessarily remain simple, as this cunning French model illustrated. It's fascinating in blue dimity with white dots and blue bias binding trim.

Note the circular cut of the skirt that permits of perfect freedom. It is attached to a brief yoke, front and back.

It's especially easy to launder. Style No. 587 is designed in sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 39-inch material with 9/4 yards of bias binding or ribbon.

Batiste prints, gingham checks, pique, organdie, crinkled crepe prints, voile prints, etc., are perfect mediums. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Offers Good Market

China Imported \$600,000 Of Cheung Gum Last Year

Last year China imported \$600,000 worth of chewing gum. This amount is estimated to total about 70,000,000 strips. The traditional Chinese equivalent of gum is the water-melon seed, of which tons and tons are consumed each year throughout the width and breadth of this vast land. Few Chinese pass a day without cracking a few black dried seeds between their teeth and it is estimated that every Chinese disposes of at least ten seeds a day. If an arbitrary population of 400,000,000 is accepted it will be seen that gum has a long way to go.

Ready For Emergency

Lady: "Now, driver, I wish you to be extremely careful. When you come to a crossing, wait until the police tell you to go on; and if the streets are very slippery, drive very slowly."

Taxi Driver: "All right, ma'am; and in case of an accident, ma'am; which hospital would you like to be taken to?"

"Did you ever do any public speaking?" asked the man in the largest rocker.

"Well," replied the chap on the three-legged stool, "I proposed to a girl in the country over a party line."

Minister (calling)—And what does your mother do for you when you've been a good girl?

Siri—She lets me stay home from church.

ARCHBISHOP OF CANTERBURY ASKS POPE HELP AVERT WAR

In a startling plea to His Holiness Pope Pius XI, to help avert war, the Most Reverend Cosmo Gordon Lang, Archbishop of Canterbury, stressed the peril surrounding world peace. In a speech before a gathering in London, the Archbishop asked the spiritual head of the Roman Catholics to call upon all his churches throughout the world to promote a better spirit of Christianity. In the photos are, left to right: The Archbishop of Canterbury, St. Peter's Cathedral in the Vatican City, and Pope Pius.

Lone Trip To North

Mrs. Grey Owl To Make Prospecting Trip Into Cold Lake Area

With as little concern as if announcing a trip to a nearby town, Mrs. Grey Owl, slim, full-blooded Ojibwa Indian, wife of Grey Owl, the widely known beaver conservationist and author, announced at Prince Albert her intentions of making a prospecting trip into the Cold Lake area, which lies beyond the Flin Flon, in northern Manitoba.

Last year Mrs. Grey Owl was all set to penetrate into the northern bushland of Ontario on a similar venture, but on the advice of old prospectors she abandoned the trip.

Now again she has yielded to the call of the trail and this week expects to launch her fruit creek at Waskesiu lake.

"Alone she will paddle down the Waskesiu river. Trading posts at Montreal lake will see her. She may halt at Lac La Ronge, then go eastward down the rushing Churchill river where she will move or leap pass out of the ken of man until she reaches the area which at present is luring the seekers of mineral wealth."

See By Light-Rays

Fish Have Vision Not Possessed By Human Eye

A blind fish can dash and zig-zag about a rocky pool and never touch an obstacle. Any fish can travel on the darkest night upstream and avoid the banks, rocks, fallen trees or tree-roots, the bottom of the stream or other fish. Only recently has the organ of this sense been discovered. You can see it if you look at any fish of the salmon family and in many others—a channel running up the length of the fish on either side. Over this is a cell containing a fluid, from which nerves run to the brain. They carry a message as to the least variation in the pressure of the outer water, as it varies with depth, and when flowing round obstacles. The fish doesn't think before acting when a danger signal of varying pressure is given. There's no time for thought. Their response to the message sent to the brain is automatic. Just as the infra-red photographic plate can take a clear photograph in a thick fog, so fish can see in murky water. They see by light-rays invisible to our own eyes.

Alberta's Fire Toll

More Casualties Last Year But Less Property Loss

Thirty deaths from fire were the cost to Alberta in 1933, according to the report of Fire Commissioner Henry Bruce, as made to Hon. R. G. Reid, provincial treasurer, for the calendar year. The number of deaths is considerably in excess of the figure for the preceding year, which was but one.

There were 1,823 fires during the year, in all parts of the province, and property loss aggregated \$1,435,612 as compared with \$2,495,491 from 1,937 fires in 1932. A reduction in losses for the second year in succession, amounting to more than a million dollars, is regarded as a highly satisfactory feature of the fire situation. It was, moreover, the lowest fire loss on record for the past 14 years.

While the number of fires was only slightly less than the year before, the report points out that the fire that did occur did not assume the proportions or cause the destruction that was the case in former years.

Eight out of every 10 fires are declared to have been due to carelessness in the handling of fire or neglect in removing fire hazards.

Transition Of Farming

Farming Has Become A Mighty Specialized Business

Years ago farming was a job, a means of livelihood; it was not a business. If the job were well done and the elements agreeable, it guaranteed a living, and, possibly enough to care for the individual in old age. Land was cheap, and in many locations it was available by simply getting on it. Taxes were of no practical consequence; soils were virgin and fertile; insects and pests were negligible; and land values were rising. The increase in land value alone was a cheap way to make the pioneer farmer independent in his old age. To-day, however, we find an entirely different picture. Farming has changed from a job, or means of livelihood, to a highly specialized, competitive business.—World's Grain Conference Proceedings.

Qualifies For Honor Roll

The only cow to qualify for the Saskatchewan 2,000-pound honor roll during April was a ten-year-old grade Holstein in the herd of H. S. Isenor, of Saskatoon. This cow, "Rosie," has four lactations to her credit in which she produced a total of 62,101 pounds of milk and 2,139.6 pounds of fat. Rosie's best year was in 1930-31, when as a seven-year-old she produced 852.8 pounds of fat and 18,588 pounds of milk.

To estimate the number of bushels of grain in a rectangular bin, multiply the length, width, and height of the grain in the bin to obtain the number of cubic feet of grain, and divide this by 1.25 to find the number of bushels.

Gold threads are made so fine in India that 1,100 yards weigh only one ounce.

Canada's Dairy Cattle

Number Is Steadily Increasing States Federal Official

Hector Cullen of the dairy branch of the federal department of agriculture, told a service club at Kentville, Nova Scotia, the number of dairy cattle in Canada is steadily increasing despite Henry Ford's prediction that before long a milk diver will replace dairy cows and synthetic milk will be in general use. "People in Canada are using more condensed milk than ever before," he said, noting that the first condensed milk factory in Canada was built in Truro, N.S.

He continued that Canada, in her best years, produced \$286,000,000 worth of dairy products.

Everybody Tries It

The human desire to get something for nothing apparently knows no class distinction. Police headquarters revealed the occupants of 58 persons arrested in raids on local bookmakers included eight day laborers, a "gentleman farmer," a journalist, a miller, six tailors, six travelling salesmen, a shoemaker and a negro porter.

Japanese are not permitted to practice dentistry in New York State.

May Undertake Study Of Barley With Object Of Improving Quality And Finding Markets

Problem In Nature

How Birds Know Their Special Points Of Beauty

A mysterious problem is presented by the way birds display to best advantage their special points of beauty, for, lacking mirrors, how should they know where their beauty lies—where are the touches of color, out of sight of their eyes, which are "savoring glories"? How should a goldfinch know the decorative value of the blaze of crimson on his face? Yet he will force the glory of his blaze on the attention of the hen he is courting, turning his head this way and that, as if to hypnotize her by its brilliant gleam. And it is very sure that he makes the most of the gold bars of his wings, as the chief feature of his white epaulets. The goldfinch dances to display those bars, and the way he stretches his wings, fanwise, with the air of a tailor, controlling the gleam of gold, has earned him the name, "proud tailor."

A hundred examples of beauty of which birds seem conscious, though it may be invisible to their own eyes, will crowd to mind. A minor one is presented by that lover of trees, the catbird. He is not content with a barren and colored image of a bird as he poses on a tree-trunk before a hen, as if to give her the best possible view of his watch-blue and buff tones. To display the buff on his breast he parades before her with steady steps and head pushed forward.

Farm Crops Production Costs

Keeping Cost Records Has Become Necessary For The Intelligent Farmer

Data on the cost of production, accurately kept for several years and then properly interpreted, makes possible a more intelligent selection of crops and shows some light on the better proportion of each crop to grow. Every farmer has his own method, as is evidenced by the story, of the farmer whose barn was on fire. His neighbors were helping him, first getting out the stock, and then the implements. Then one of the helpers saw the farmer vainly attempting to wrench off the barn door and asked "What in the world do you want with that old door?"

The farmer replied "Well, that door has all my money on it for the last five years, and I have got to save it." Of other methods used in estimating the cost of producing crops, much valuable information on every phase of cost may be found in the latest bulletins on the subject (No. 159) from the Dominion Department of Agriculture, Canada, issued by the Dominion Department of Agriculture.

To Preserve Order

May Pass Legislation In England To Empower Police To Enter Political Meetings

Legislation empowering the police to enter political meetings when their presence is warranted in the interests of peace and order will be likely effected at once in the British House of Commons. It is planned to have it ready for application to a scheduled Fascist rally at the White City stadium in August.

The government's decision to tighten the present law, which limits police attendance at political meetings unless they are invited or disorders are anticipated, followed a debate in the commons in which Sir John Gilmour, home secretary, intimated the government might have to arm itself with further powers to prevent disorders.

Leaders of all parties in the house will be consulted on the new legislation, it was said. Recent clashes between Fascists and Communists were referred to during the debate.

Saw Jumping Deer

Conrad Schoenhof's reward for early rising was the sight of a jumping deer browsing contentedly close to his garden fence at Quinton, Sask. It showed no alarm when Mrs. Schoenhof joined her husband, nor when an attempt was made to obtain a picture. But, even in June, successful snapshots cannot be taken at 4 a.m.

The first recorded observation of the bodies we now recognize as bacteria was made about the middle of the seventeenth century by Antony van Leeuwenhoek, a Holland lens grinder.

The world's wealthiest man is said to be the Indian prince, the Nizam of Hyderabad, who is reported to keep \$500,000,000 worth of gold in his palace.

The only notable increase in Sunday school attendance in the world, in recent years has been in Africa.

Tomatoes grow reddest if not exposed to the hottest sun.

U.F.A. CONVENTION JULY 23

The Lacombe Constituency U.F.A. Convention will be held in the Church Hall, Lacombe, on Monday, July 23, afternoon and evening. As very important business will be brought up, a large crowd is expected.

DAIRY PRODUCTION GROWS

Although 1933 season was the largest in Alberta's history for production of creamery butter, the present season, at least for the first half of the year shows an even greater increase. The total amount of butterfat delivered to creameries from January to June inclusive this season has been 10,827,000 lbs., compared with 9,856,000 lbs. for the similar period last year. This is an increase of 11.7 per cent. The largest increase has been in the central and northern sections.

NOTICE

"A motion was passed at a meeting of the Council of Municipal District of Crown No. 399, held on July 12, 1934, as follows: The Council of Crown No. 399 will not be responsible for any hospital account, unless satisfied with approval of the Secretary or Chairman of Health Board."

Saturday's Special—2 gallon crock at 45c. Morrison and Johnston, Ltd.

The annual camp meeting of the Free Methodist Church is being held at Alx and close on Sunday, July 22nd. Meals free and everybody welcome.

Special for Saturday July 24th. Tumblers 8c. each at Morrison and Johnston, Ltd.

We saw this in a paper, but do not know whether it refers to our Bob or not. "Bob McKenzie, driving a Ford V-8 motor, made a coast to coast record of 54 hours and 40 minutes, from Perth Amboy, N.Y. to Los Angeles, covering 3246 miles, at an average speed of 59.35 miles per hour." Let Bob Parks tell you all about it.

Large Milk Jugs, Regular 10c. Saturday Special 8c. at Morrison and Johnston, Ltd.

The Editor of The United Farmer should get it into his head that Judge Ives did not overrule the jury's verdict of John B. Brownlee being guilty of seducing a government stenographer. Judge Ives only overruled the award of money—the seduction charge stands.

Commenting on the selection of Hon. R. G. Reid, as premier of Alberta, the Toronto Star says he came to Canada at the age of twenty-four and worked as a lumberjack for a time. From this it deduces that Canada is a land of opportunity. Mr. Reid's greatest present opportunity is to invite the people to pass opinion on the U.F.A. administration.

AT THE AVALON

"TAKE A CHANCE"

Fifty beautiful choruses, a cast which includes such outstanding names as those of James Dunn, Lilian Roth, Cliff Edwards, June Knight, Charles "Buddy" Rogers, Lilian Bond, Dorothy Lee and Lena Andre; a host of song writers and lyricists that reads like a Who's Who of The Tin Pan Alley and the expert production of Messrs. Lawrence Schwab, William Rowland and Monte Brice, combine to make Paramount's musical extravaganza, "Take a Chance," one of the delights of the current season. This picture must not be classified as just another back stage romance. Its scenes range all the way from a carnival side show, through a swanky gambling club, out to the homes of the society elite on Long Island and back to Broadway. Beautiful music, beautiful girls, outstanding work by all-star cast and a strong story full of thrills, laughter and non-sense are carefully blended into a picture that is a pleasure to sit through, not once but several times.

COMING:

Zane Grey's "Thundering Herd" and James Cagney in "Jimmy the Gent," July 26 and 28.

The MacMillan Appeal Fund sponsored by the Edmonton branch of the Canadian Civil Liberties Association is growing fast, at present over \$600 having been subscribed. The purpose of this fund is to appeal against the recent judgment of Mr. Justice Ives in the recent Brownlee-MacMillan case. Subscriptions are being forwarded from all towns and cities in Alberta and even from other provinces. Anyone wishing to help this fund along may send their subscription to the Edmonton Bulletin or direct to the secretary of the MacMillan Appeal Fund, Richard Jerkin, 10444 Jasper Avenue, Edmonton, Alberta.

The I.O.O.F.E. will hold an afternoon tea at Mrs. P. W. Pratt's cottage at Gull Lake on Wednesday, July 25th, at which a beautiful quill will be raffled off at 5 o'clock. Everyone is invited to attend.
